

Outside of the Box Design

Anita Shackelford 2010

Sometimes thinking outside of the box is the way to go. This creative layout was designed by Joan Knight. The pieced top is a simple nine patch, but the quilting design gives it grand style.

Only one P2P Triangle pattern was used to design this entire quilt. The pattern is called Sew Simple and it was simple to set lines of P2P patterns along the border seams.

The patterns in the corner patches and some interior plain blocks were placed by clicking the four corners of each block.

The expanded center and the large medallion corners are good examples of not being restrained by the size of the patchwork.
